Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentation (Datendokumentationen)

Series D - Variable Descriptions and Coding

Series E – SOEPmonitors

Series F – SOEP Newsletters

Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at http://www.diw.de/soepsurveypapers

1 Overview

\$HBRUTTO covers all households, who were successfully interviewed for the first time in wave \$ or were contacted for the purpose of being interviewed again in wave \$.

The data sets provide gross cross-sectional information on all SOEP households' interviews as well as their positions in the panel frame work. Therefore, the variables HHNR, HHN-RAKT, \$HHNR, SAMPLE1, and SOURCE are included in the datasets.

The data sets also contain information on:

- The household's region
- Gross information on the persons living in the household
- The date of the last interview
- Adress and contact information
- The date of the last interview
- Interviewer and contact information
- Work form information
- Incentive and additional information

All documented distributions relate to Version31 of the SOEP data (2014).

2 Household Hierarchy Variables

Variables to indentify the household in the hierachy:

hhnr – Original Household Number [generic]

Identifier for the household on the highest hierachy level to which the household can be traced back to. [This information can be related to a specific variable and is not necessary generic.]

hhnrakt - Current Wave HH Number (=BFHHNR) [generic]

Identifier for the household (=\$HHNR) at the time of the interview. [This information can be related to a specific variable and is not necessary generic.]

\$hhnr - Current Wave HH Number (=HHNRAKT) [generic]

Identifier for the household (=HHNRAKT) at the time of the interview. [This information can be related to a specific variable and is not necessary generic.]

3 Panel Structure Variables

Variabels to indentify the household in the panel structure:

sample1 - Sample Indicator [generic]
