SOEP – The German Socio-Economic Panel study at DIW Berlin

2018

SOEP-Core v33.1 – \$PBRUTTO

SOEP Group

Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentation (Datendokumentationen)

Series D – Variable Descriptions and Coding

Series E – SOEPmonitors

Series F – SOEP Newsletters

Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveyspapers>

1 Overview

\$PBRUTTO covers all respondents, who were successfully interviewed for the first time in wave \$ or were contacted for the purpose of being interviewed again in wave \$.

The data set provides gross cross-sectional information on all SOEP respondents' interviews as well as their positions in the panel frame work.

Therefore, the unchanging person ID number PERSNR and the variables HHNR, HHNRAKT, \$HHNR, SAMPLE1 and SOURCE are included in the dataset, to build a link between sample structure, household hierarchy and the person level.

For better identification, additional demographic information like \$SEX, \$GEBURT and \$PNAT are included in the dataset. However, it is recommended to use the demographics in PPFAD for cross sectional and longitudinal analyses, since the information in PPFAD was tested for consistency more carefully.

In the following, the already mentioned information and variables on:

- The respondent's affiliation to the household
- Respondent's interview status, work form and result
- Respondent's penal history
- Respondent's dwelling status
- Additional questionnaires
- Non-respondents

are documented.

All documented distributions relate to Version 31 of the SOEP data (2014).

2 Household Hierarchy Variables

Variables to indentify the respondent in the household hierarchy:

persnr – Never Changing Person ID

Respondent's unchanging person ID number.

hhnr – Original Household Number

Identifier for the household on the highest hierachy level to which the respondent's household can be traced back to.

hhnrakt – Current Wave HH Number (=BGHHNR)

Identifier for the respondent's household (= \$HHNR) at the time of the interview.

\$hhnr – Current Wave HH Number (=HHNRAKT) [generic]

Identifier for the respondent's household (=HHNRAKT) at the time of the interview. [This information can be related to a specific variable and is not necessarily generic.]

3 Panel Structure Variables

Variabels to indentify the respondent in the panel structure:

sample1 – Subsample Identifier TNS-Infratest

1	[1] A German HH Head, West	4038
2	[2] B1 Turkish HH Head	286
3	[3] B2 Yugoslav HH Head	149

-3	[-3] Answer improbable	0
-4	[-4] Inadmissible multiple response	0
-5	[-5] Not included in this version of the questionnaire	0
-6	[-6] Version of questionnaire with modified filtering	0

Unchanging subsample information: for example, a person from Sample C would retain this original sample number (the sample in which the household first entered SOEP) even after having later moved to West Germany (see also the comments on the variables \$SAMPREG). Similarly, a person from Sample B who acquired a new nationality would still remain in his original sample.

4 Demographic Variables

Information on respondent's unchanging demographics:

\$geburt – Year Of Birth [generic]

This variable indicates the respondent's year of birth. [This information can be related to a specific variable and is not necessarily generic.]
