## Reading Aid

This representation of the questionnaire contains the same informations as the portal [paneldata.org](https://paneldata.org).

The diagram illustrates the structure of a questionnaire entry. It shows two questions, Q72 and Q73, with their respective text, instructions, and answer options. Labels on the left point to specific parts of the entry:

- question number:** Points to the question number (Q72, Q73).
- question text:** Points to the main text of the question.
- interviewer instruction:** Points to the instruction text (e.g., "This refers to Germany...").
- answer options:** Points to the list of possible answers (Yes, No, No answer).
- in blue: identifier for filter:** Points to the identifier (Q72:lsta1).
- in blue: filter with condition:** Points to the filter condition (Q72:LSTA1=2).
- grey bar: open or numeric answer:** Points to the grey bar representing the answer.

On the right, a label points to the green text: "in green: dataset name variable name variable label".

**Question 72:** Q72 Now we would like to know something about you personally. Were you born in Germany?  
 This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.  
 Yes 1  
 No 2  
 No answer -1  
 Q72:lsta1 bio I0013 born in Germany  
 Q72:LSTA1=2  
 Q73 What country were you born in?  
 Please enter the current name!  
 Q73:lsta2 bio I0016 Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].
