CITY BRAND PERSONALITY – AN INTERNATIONAL CONCEPT WITH REGIONAL APPLIANCE IN THE TOURISM DEVELOPMENT STRATEGY

Oana Tugulea\* Claudia Bobalca† Camelia Soponaru‡

**Abstract:** The personality of a city is an important concept to be created and evaluated by local administrators as this should be part of the touristic strategic approach.

The aim of this paper is to create a research instrument that allows researchers to define the brand personality of a Romanian city. In order to use one instrument in a specific geographical area, the instrument has to be created using a qualitative research.

Three focus groups were conducted in order to identify items to create the research instrument which is presented at the end of the paper. This research is a preliminary step for a future quantitative research that is intended to measure the city brand personality of the city of Iasi. The created instrument can be applied to any Romanian city.

1. INTRODUCTION

In the marketing literature, brand personality is defined as "the set of human characteristics associated with a brand" (Aaker, J. L., 1997, p. 347). One important aspect to consider when dealing with branding is that brands have human personality features to help them differentiate from other brands; these features are important to consumers (Goldsmith, Ronald E. and Goldsmith, Elizabeth B., 2012).

Aaker, J. L. (1997) first developed a framework and scale of brand personality dimensions that can be generalised on various product categories. According to Aaker, J. L. (1997), consumers perceive brand through five personality dimensions: Sincerity, Excitement, Competence, Sophistication and Ruggedness.

The role of brand personality is important for customer retention and company's performance (Farhat, Reshma and Khan, Bilal Mustafa, 2011).

There are two possibilities to associate personality traits to a brand. Personality traits are defined by people that are associated with the brand in a direct manner, such as the company's CEO, the employees or the endorsers (Aaker, J. L., 1997, McCracken, 1989). The indirect manner of associating personality traits is using certain products features, a certain logo, an advertising style, the brand name itself etc. (Aaker, J. L., 1997, Batra, Lehmann, Singh, 1993).

According to Lee Eun-Jung (2009), the concepts required for the new brand personality studies are: (1) *context oriented* – consumers establish the meaning of brand as their lives are projected, which is contextual; (2) *consumer-oriented* – the meaning of the product have to be understood from the consumers' perspectives.

Avis (2012) revises the factor based models mostly used in the brand literature. In his critical review, he identifies three key problems: (1) the problem concerning the category confusion, (2) the problem concerning the domain adjustment and (3) the problem concerning the descriptor selection.

Naresh, Sheena, G. (2012) study in the FMCG industry underlines the fact that Aaker J. L. (1997) brand personality's traits influence the brands in a strong manner, helping to build brand success. Her research concludes by directing marketers to focus on their brands' significant personality traits into products strategies of positioning and communication.

Avis, Mark (2012) identifies problems of the brand personality models presented in the literature connected to perceive ness of brands as humanlike, questioning the validity of this theory.

# 2. BRAND PERSONALITY CONCEPT APPLIED IN VARIOUS AREAS OF RESEARCH

Brand personality concept has large implications in other area of research as well. For example, Goldsmith, Ronald E. and Goldsmith, Elizabeth B. (2012) concluded that brand's personality has an important part in generating consumer engagement with the brand. They conducted a survey on 132 college students that supports this statement on the case of North Face brand of clothing. As a conclusion, this study explains how consumers can become attached to a specific brand (Goldsmith, Ronald E. and Goldsmith, Elizabeth B., 2012).

The influence of brand personality on advertising response in the fashion industry was examined by Azevedo, Antonio and Farhangmehr, Minoo (2005).

Farhat, Reshma and Khan, Bilal Mustafa (2011) propose a model that presents the concept of brand loyalty through the concept of brand personality. The model uses brand personality in order to explain the process of customer loyalty.

Perepelkin, Jason and Zhang, David Di (2011) study investigates if consumers identify different brand personalities associated to different types of pharmacies and the possible effect that brand personality types on consumer trust. Dividing pharmacy types into independent and corporate chains, consumers trust slightly more the independent ones as these are perceived to have a sincere and competent brand personality. Sincerity and competence positively and significantly contribute to customers' trust.

Lee, Hee-Jung, Suh, Yong-Gu (2011), conducted a research that provides a city personality scale applicable to the Korean tourism market. This study considered previous studies applied in different cultural contexts, considering Aaker's Brand Personality Scale. The City Personality Scale applied in Korea has five dimensions with fifteen items; "sincerity", "excitement", "high-class", "technology", and "femininity". The first two dimensions are similar to Aaker, J. L. (1997) model of brand personality. Competence corresponds to "technology" and "high-class". Ruggedness and Sophistication are very sensitive to the cultural context.

Ahmad, Muhamad Fazil, Abdullah, Zulhamri Bin, Tamam, Ezhar Bin, Bolong, Jusang Bin (2013) conducted a study in order to define a city brand personality scale applicable to the Malaysian context, based on Aaker, J. L. (1997) Brand Personality Scale. The research investigates the causal relationship between determinants of dimensions of city brand and the city brand. Structural equation modelling was used in order to investigate the causal

relationship. Ahmad, Muhamad Fazil, Abdullah, Zulhamri Bin, Tamam, Ezhar Bin, Bolong, Jusang Bin (2013) found four dimensions and seventeen items of the city brand personality: "Peacefulness", "Malignancy", "Sophistication" and "Uniqueness".

According to Ahmad, Muhamad Fazil, Abdullah, Zulhamri Bin, Tamam, Ezhar Bin, Bolong, Jusang Bin (2013), the Malaysian context presents a slightly different scale for city brand personality comparing to Aaker, J. L. (1997) Brand Personality Scale. In Ahmad, Muhamad Fazil, Abdullah, Zulhamri Bin, Tamam, Ezhar Bin, Bolong, Jusang Bin (2013) study, the city brand personality in the Malaysian context has 5 factors: "Peacefulness", "Malignancy", "Sophistication", "Uniqueness" and "Conservatism". As in Lee, Hee-Jung, Suh, Yong-Gu (2011) study, the dimension of ruggedness was not reliable. The dimension of Sincerity corresponds to "Peacefulness". The dimension of Competence corresponds to "Malignancy". The dimension of Excitement corresponds to "Uniqueness".

#### 3. RESEARCH METHODOLOGY

This research was conducted with the purposes to create a questionnaire for a further quantitative research. The purpose of the entire research (qualitative and quantitative) is to create an instrument to assess the City Brand Personality applicable for any Romanian city. As the literature review revealed, the general Brand Personality scale and the City Brand Personality scale are both sensitive to the cultural context. This leads to the necessity of creating the measurement instrument starting with the qualitative research.

This article presents the qualitative research step and the instrument – the City Brand Personality scale resulting from this exploratory and instrumental research.

#### 3.1. Research Method

We conducted three focus groups in order to identify items to create the research instrument. This method was appropriate given the nature of the sample (students at the Al. I. Cuza University of Iasi – Romania).

# 3.2. Sampling

The investigated population consists of young Romanian educated tourists that visited at least one Romanian city in the past year. Given the nature of the sample and the convenience, we considered students to represent the population. In order to have a representative sample, we selected three groups of 10-12 students of different years of study (bachelors 'degree - second and third year of study and masters' degree first year of study) from different specializations in the Faculty of Economics and Business Administration (Public Administration, Management and Finance). The focus groups were conducted in seminar rooms of the Faculty of Economics and Business Administration.

#### 3.3. The research instrument

The focus group guide was tested on one group of 12 Bachelors' degree, third year of study students at the Business Administration specialization. The focus group instrument was edited according to the suggested rules in the literature.

The first two sections of the focus group guide were dedicated to open up participants to conversation (hobbies, travelling, visiting cities). These sections were not recorded from the results point of view. This part of the guide was very useful in creating the conversational environment.

The third section was composed of questions that asked participants to select one city in Romania they visited in the past year and speak about it from various points of view, as if that city was a person.

The fourth section applied to the same city participants have chosen. Participant were asked to say whether the city they selected is sincere, exciting, competent, sophisticated and rugged and to explain each answer ("Why do you say that?", "What makes you believe that?" etc.). We followed the general Brand Personality scale in order to find eventual new personality traits that could correspond to various cities.

The questions in the third and fourth section are presented with the results.

## 3.4. Research results

We present below the focus group discussion results. The first column represents the question in the focus group guide. In the second column we integrated the most representative answers. The third column is composed of raw items to be gathered and analyzed, processes or modified for the quantitative stage questionnaire.

#### **CONCLUSIONS**

This research is a preliminary step for a future quantitative research that is intended to measure the city brand personality of the city of Iasi.

The general concept of Brand personality depends on the cultural context. In order to apply this scale for a Romanian city, a new qualitative research was needed. As the qualitative research didn't refer to a specific city in Romania, the created instrument can be applied to any Romanian city, on condition that the investigated population consists of educated young Romanian tourists. For another type of target, a new preliminary qualitative study is necessary.

This instrument is not the final questionnaire for the quantitative step. The instrument will be tested on 20-30 respondents in order to filter the personality characteristics and eliminate those features referring to the same characteristic. Also, the quantitative analysis will continue to filter these characteristics during the factor analysis procedure.

The research limits refer especially to the sample restriction (educated Romanian young tourists). This instrument has the advantage to be applicable to any Romanian city but the research can be conducted only for a certain type of population.
