1 Overview

HBRUTTO covers all households, who were successfully interviewed or were contacted for the purpose of being interviewed again.

The data sets provide gross cross-sectional information on all SOEP households' interviews as well as their positions in the panel frame work. Therefore, the variables HID, SAMPLE1, and CID are included in the datasets.

The data sets also contain information on:

- The household's region
- Gross information on the persons living in the household
- The date of the last interview
- Address and contact information
- The date of the last interview
- Interviewer and contact information
- Work form information
- Incentive and additional information

2 Identifiers and Sampling

hid – Current Wave HH Number (=HHNRAKT)

cid – Case-ID, Original Household Number

Case Id - Household Source Identifier (fixed) to which the current household can be traced back to. This variable is relevant for sampling information and calculating the weights.
