## SOEP-IS 2020 – Questionnaire for the SOEP Innovation Sample (Update Release 2021)

SOEP-IS Group

Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

- Series A – Survey Instruments (Erhebungsinstrumente)
- Series B – Survey Reports (Methodenberichte)
- Series C – Data Documentation (Datendokumentationen)
- Series D – Variable Descriptions and Coding
- Series E – SOEPmonitors
- Series F – SOEP Newsletters
- Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveypapers>

## Reading Aid

This representation of the questionnaire contains the same informations as the portal [paneldata.org](https://paneldata.org).

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

**Q158** The following questions deal with partnership and marriage or registered same-sex partnerships (eingetragene gleichgeschlechtliche Partnerschaft). All of these questions deal with your relationship, whether you are married or not. Some questions deal with your current relationship and others deal with past relationships. We will start with your current relationship and then ask you to look back on relationships you had before. In the case of past relationships, we are talking about relationships that lasted six months or longer.

*Whenever referring to marriage, we are also referring to registered same-sex partnerships!*

Q461:palkoft p palkoft How often do you drink alcoholic drinks

Q461:palkoft=1:5

**Q462** If you drink alcohol, how many alcoholic beverages do you usually consume in a day?  
Please calculate according to the following example.

*For example, one drink corresponds to one eighth, i.e. 0.125 liters of wine or sparkling wine - a bottle of wine of 0.75 liters would then correspond to six drinks. Or 0.33 liters of beer correspond to one drink - two of the 0.5 liters of beer common in some regions would then correspond to three drinks. Or 1 schnapps, whiskey, brandy, etc. equals one drink - a double of that equals two drinks. For mixed drinks, please try to estimate the proportion yourself. Please submit list 462!*

## Inno23 Number experiment

**Intro4** Now I would like to invite you to participate in a short and simple game. The task consists of two parts. What the two parts are about, you will learn immediately before. In both parts you have a chance to win real money. But only one of the two parts will be selected for the final payout. You will flip a coin for it. If the coin shows “tails” after the toss, you will get the result for part 1. If the coin shows “heads”, you will get the result for part 2. All information from the game, like all other information from this interview, will be evaluated anonymously only and will not be associated with your name. This is the end of the introduction.

*Please do not inform the target person in advance about the content of the two games! As the interviewer, make sure that the target person does not see the dice cup and dice before the dice game begins. Please do not give the dice cup and dice to the target person until the target person asks you for it!*

**Q490** Would you like to play the game?

*Before starting the module: As the interviewer, please try to make sure that no other interviewee is within earshot. As the interviewer, also try to leave the room or turn away so that the target person can answer the questions alone. It is important that the target person can complete the following tasks in complete privacy. If the target person agrees to play the game, please hand over the laptop to the target person for self-completion. After the experiment, the target person will be asked to hand over the laptop to you and continue the interview as regular.*

**Q493** The interviewer has just given you a 10-sided die and a dice cup. Now please roll the dice as many times as you like using the dice cup. Caution: Make sure that the interviewer does not see the result of your roll. Please remember the result of your first roll and enter it on the screen. How much you can earn in this part, if this part of the task is selected for payout, depends on the number you write down here. A higher number means a higher payout. You can see the exact payout for each reported number in the table below. The table will remain on the screen until you enter your number.

*Note: Please have your interviewer hand you the dice cup and dice cup. Please make sure that no one can observe you playing the game.*

**Q494** In this part you will see 10 black boxes on your screen. There are numbers behind the black boxes. The numbers behind the black boxes are 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9. The numbers are in random order, so the first box does not necessarily contain 1, the second does not necessarily contain 2, and so on. As soon as you click on a black box, the number hidden behind it is displayed. You can click on as many black boxes as you like. The laptop records how many and which boxes you click. Please remember the number behind the first black box you clicked and enter it on the screen. How much you earn in this part, if this part of the task is selected for payout, depends on the number you enter. A higher number means a higher payout.
