**Correction to:** *Health Econ Rev* 10, 19 (2020)  
<https://doi.org/10.1186/s13561-020-00273-0>

Following publication of the original article [1], the authors reported an error in their paper after publication that the supplementary table was captured as Table 3 while Table 3 was used as the supplementary file. In addition the table headings were incorrectly assigned. The correct Table 3 is shown below. The original article [1] has been updated.

Cohen's  $d$  was calculated as the difference between the mean of the intervention and control group, divided by the pooled standard deviation of both groups.  
The effect sizes are defined as small ( $d = 0.2$ ), medium ( $d = 0.5$ ) and large ( $d = 0.8$ )
