**SOEP** Survey Papers  
Series D – Variable Descriptions and Coding

## SOEP-IS 2023 – HPATHL: Household-Related Meta-Dataset (Long)

SOEP-IS Group

Running since 1984, the German Socio-Economic Panel (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

- Series A – Survey Instruments (Erhebungsinstrumente)
- Series B – Survey Reports (Methodenberichte)
- Series C – Data Documentation (Datendokumentationen)
- Series D – Variable Descriptions and Coding
- Series E – SOEPmonitors
- Series F – SOEP Newsletters
- Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveyspapers>

## 1 Primary Key, Foreign Keys and Sample Information

### cid – Original Household Number, Case ID

---

Case Id - Household Source Identifier (fixed). The fixed household source id point to the first SOEP ancestor households to which current households can be traced back to. This variable is relevant for sampling information and calculating the weights.

### hid – Current Wave HH Number

---

The members and configuration of a household with a given ID (HID) can change between years. Depending on the respective research issue it may be necessary to check alterations using PPATHL, where persons are assigned to a household in each year.

### syear – Survey Year

---

|      |       |
|------|-------|
| 1998 | 373   |
| 1999 | 388   |
| 2000 | 405   |
| 2001 | 428   |
| 2002 | 432   |
| 2003 | 443   |

| -8  | Question this year not part of survey                       | 0     |

## 2 Survey History

### hnetto - Aktueller Befragungsstatus

---

|    |   |       |
|----|---|-------|
| 1  | Successful HH Interview                           | 50839 |
| 2  | HH In Brutto Only                                 | 29995 |
| 3  | unsuccessful, initial gross sample                | 0     |
| -1 | No Answer   | 0     |
| -2 | Does not apply                                    | 0     |
| -3 | Answer improbable                                 | 0     |
| -4 | Inadmissible multiple response                    | 0     |
| -5 | Not included in this version of the questionnaire | 0     |
| -6 | Version of questionnaire with modified filtering  | 0     |
| -7 | Only available in less restricted edition         | 0     |
| -8 | Question this year not part of Survey program     | 0     |

Wave-specific survey status: for HNETTO=1 there is a HH interview in the respective year, i.e. an entry in the file HL. For HNETTO=2 there is only an entry in the file HBRUTTO, but

the HH could not be interviewed (the reason for which is given by the variable HERGS in the file HBRUTTO). HNETTO=3 indicates unrealized Households of new samples in HBRUTT-Files.

### 3 Basic Demographic Information

#### sampreg – Aktuelle Stichprobenregion

---

|    |   |       |
|----|---|-------|
| 1  | West-Germany                                      | 64041 |
| 2  | East-Germany                                      | 14159 |
| -1 | No Answer   | 0     |
| -2 | Does not apply                                    | 76    |
| -3 | Answer improbable                                 | 0     |
| -4 | Inadmissible multiple response                    | 0     |
| -5 | Not included in this version of the questionnaire | 0     |
| -6 | Version of questionnaire with modified filtering  | 0     |
| -7 | Only available in less restricted edition         | 0     |
| -8 | Question this year not part of Survey program     | 2558  |

The variable SAMPREG tells whether a HH was located in West or East Germany in the respective year. This variable approximates also former regional differences within Berlin according to zip-codes.

#### hpop – Aktuelle Populationszugehoerigkeit

---

|    |   |       |
|----|---|-------|
| 1  | Private HH, German HH-Head                        | 46156 |
| 2  | Private HH, Foreign HH-Head                       | 2180  |
| 3  | Institutionalized HH, German HH-Head              | 244   |
| 4  | Institutionalized HH, Foreign HH-Head             | 26    |
| -1 | No Answer   | 0     |
| -2 | Does not apply                                    | 32228 |
| -3 | Answer improbable                                 | 0     |
| -4 | Inadmissible multiple response                    | 0     |
| -5 | Not included in this version of the questionnaire | 0     |
| -6 | Version of questionnaire with modified filtering  | 0     |
| -7 | Only available in less restricted edition         | 0     |
| -8 | Question this year not part of Survey program     | 0     |

POP was derived from WUM2 in HBRUTTO as well as PNAT\_V\* and STELL\_V\* (nationality and relationship to head of household in PBRUTTO). Missing values were imputed based on the person's history. Thus, the only admissible missing value is -2, meaning not applicable. This variable is therefore particularly important, as it enters into the determination of cross-sectional weights. The variable corresponds with POP in PPATH/L.

### 4 Weighting

#### hbleib – Inverse Staying Probability

---

inverse probability weights

**hhf** – PRELIMINARY: Weighting factor

---

standard household weight. The weighting for the 2023 survey year is based on the previous year's marginal distribution. The updated marginal distributions of the Federal Statistical Office of Germany for 2023 were not yet available to us at the time of the data release. We therefore ask you to apply the weighting for 2023 with caution. The newly drawn sample in 2023 had to be integrated into the weighting with the information on the marginal distributions of the previous year, which can lead to additional inaccuracies.
