SOEP-IS 2023 – PPATHL: Person-Related Meta-Dataset (Long)

SOEP-IS Group

Running since 1984, the German Socio-Economic Panel (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentation (Datendokumentationen)

Series D - Variable Descriptions and Coding

Series E - SOEPmonitors

Series F - SOEP Newsletters

Series G - General Issues and Teaching Materials

The SOEP Survey Papers are available at http://www.diw.de/soepsurveypapers

Editors:

Dr. Jan Goebel, DIW Berlin

Dr. Christian Hunkler, DIW Berlin

Prof. Dr. Philipp Lersch, DIW Berlin and Humboldt-Universität zu Berlin

Dr. Levent Neyse, DIW Berlin and Berlin Social Science Center (WZB)

Prof. Dr. Carsten Schröder, DIW Berlin and Freie Universität Berlin

Prof. Dr. Sabine Zinn, DIW Berlin and Humboldt-Universität zu Berlin

1 Primary Key, Foreign Keys and Sample Information

cid - Original Houshold Number, Case ID

-1	No Answer	0
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question not part of the survey program this year	0

Case Id - Household Source Identifier. The fixed household source id points to the first SOEP ancestor household for this person. The person does not necessarily need to have ever lived in a household with this number. This is relevant for sampling information and calculating the weights.

hid - Current Wave HH Number

-1	No Answer	0
-2	Does not apply	31
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question not part of the survey program this year	0

The household the person belongs to in the corresponding year (SYEAR).

pid - Never Changing Person ID

-1	No Answer	0
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question not part of the survey program this year	0

A person can be uniquely identified with variable PID. Together with SYEAR primary key in this file.

syear – Survey Year

1998		936
1999		963

-8	Question this year not part of Survey program	0

This variable indicates available information and files for the entire SOEP individuals. Netto-codes 10-19 (and 29) define the respondents population of PGEN, the codes 20-28 indicate children, 30-39 unit-non-responses in partially realized households, and the codes 90-99 describe permanent (or temporary) dropouts. Further differentiations point to the survey instruments (questionnaires). The Codes 10-39 describe the population in realized (and partially realized households).

casemat - Case-Match, combined panel households

0 863637	CASE With HH Details	4 1
4030805		1
4095826		1

-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

It is possible that Individuals from different original households (CID) move together in one common household. Then people with identical values for (HID) in one wave may have different values for CID. Only for those persons moving together CASEMAT contains the HID of the other household members. This information is not relevant when linking person and household data based on the current household number HID.

3 Basic Demographic Information

parid - Partner Person Number

-1	No Answer	0
-2	Does not apply	81916
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question not part of the survey program this year	0

Partner indicators have the purpose of defining couples in SOEP households and thus to make possible analyses on the dyadic level. Persons without spouse and (cohabitating) partner receive a missing code "-2" (=does not apply). Also, the variable PARTNER is coded 0, 3, 4, 5 in these cases. In couples, partner is the value of the unchanging person ID number (=PID) of the partner. The assignment of the partner ID within households is based on four sources of information: A question in the person-file, that asks (unmarried) respondents to identify their partner in the household, the household matrix reported by the head of household at the beginning of the interview (stell_v1 stell_v2 stell_h in pbrutto), and self-reports on marital status and life events, such as marriage, move in with partner, separation, etc. In unclear cases, due to temporal non-response for instance, we also consider longitudinal information from previous and prospective waves. Moreover, PARID is self-consistent between two individuals. For analyses of partner relationships, this information can be used to link all persons with their respective partners, and all information on both partners can also be stored in a common dataset.

partner - Status Of Partnership

0	No partner	81303
1	•	
I	Spouse, registered partner	41805
2	Partner	7149
3	Probably spouse, registered partner	138
4	Probably partner	139
5	not clear	205
-1	No Answer	419
-2	Does not apply	39
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

The variable PARTNER generated in the context of the partner identifier (PARID) to describe whether a person in a SOEP household has a partner in that household, and if so, the type of relationship existing between the partners. Relationships with persons outside the SOEP

household are not covered by this variable. Code 0 is assigned to all single persons living in households and those with partners outside the household. Codes 1 to 4 describe relationships. To assign Codes 1 and 2, the partnership has to be definable from the perspective of both partners unanimously. If conflicting information exists between partners, the codes 3 or 4 are assigned. If it is unclear whether an individual has no partner or whether she forms a couple with one other household member, we assign the code 5. Registered partnerships (civil unions) for same-sex couples were introduced in Germany in 2001. Though, registered partnerships are legally not equal to marriage, they are listed in the same category.

sex - Gender

1	Male	63761
2	Female	67045
-1	No Answer	391
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

Respondent's (last) sex, plausibility longitudinally validated.

gebjahr - Birth Year, 4-digit

1907		4

-8	Question this year not part of Survey program	0	

POP was derived from WUM2 in HBRUTTO as well as PNAT_V* and STELL_V* (nationality and relationship to head of household in PBRUTTO). Missing values were imputed based on the person's history. Thus, the only admissible missing value is –2, meaning not applicable. This variable is therefore particularly important, as it enters into the determination of cross-sectional weights. The variable corresponds with HPOP in HPATHL. See also the description of NETTO.

todjahr - Year Died, 4 Digits

2011		46

-8	Question not part of the survey program this year	0

The variable TODJAHR contains the four-digit year of death for persons whose death could be firmly established or a missing value code:

- (-2): persons, for whom it is unknown whether they are deceased (that is, both persons still living up to that wave, and persons whose exact whereabouts is unknown and have dropped out of SOEP)
- (-1): persons, for whom the fact of death is known, but the year of death is unknown.

-7	Only available in less restricted edition	0
-8	Question not part of the survey program this year	0

IMMIYEAR contains information on the year of immigration to Germany for all persons who have ever been a part of a SOEP household (i.e., the population from PPFAD, PPATH or PPATHL) and who were not born in Germany (see GERMBORN).

germborn – Born in Germany

1	born in Germany or immigr.<1950	117164
2	not born in Germany	12623
-1	No Answer	1410
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

GERMBORN and CORIGIN give information on the country of birth, with the exception of persons who immigrated to Germany before 1950 who are considered to have been born in Germany (the Federal Republic of Germany was founded in 1949).

corigin – Country Born In

4	Afghanistan	64
8	Albania	65
10	Antarctica	0

-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

For persons who, according to GERMBORN, were not born in Germany, the variables CO-RIGIN and IMMIYEAR designate the country of origin and the year of immigration to Germany, respectively. Respondents who were born in Germany were assigned the code (1) (see GERMBORN).

gebmonat – Month Of Birth

1	January	10081
2	February	9378
3	March	11149
4	April	10284
5	May	10380
6	June	9790
7	July	10744
8	August	10236
9	September	10030
10	October	10233
11	November	9276
12	December	9122
-1	No Answer	10494
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

The month of birth of a respondent is created with information from net and gross datasets (i.a. information from questionnaires header or household protocol). For about 96% of the respondents, there was no discrepancy between this information. In 3.3% of the respondents, the mode of the month of birth is used when there is differing information. For the rest, the most plausible/newest information was used (for less than 1%). For about 20% of respondents there was no information about the month of birth at all, but for about 1000 persons it was possible to use indirect information, such as the move-in date of a newborn child.

loc1989 - Where did you live in 1989?

1	East Germany (DDR) incl. East Berlin	17072
2	West Germany (FRG) incl. West Berlin	58529
3	Abroad (Ausland)	6814
-1	No Answer	11649
-2	Does not apply	37133

-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

The variable LOC1989 in the meta-file PPFAD / PPATH provides information about a person's residence prior to German reunification, distinguishing among "(1) German Democratic Republic [GDR]", "(2) Federal Republic of Germany [FRG] (including West Berlin)", and "(3) abroad". Respondents born after 1989 (GEBJAHR in PPATH) were coded as "(-2) does not apply" on LOC1989.

migback - Migration background

1	no migration background	104260
2	direct migration background	12623
3	indirect migration background	12904
-1	No Answer	1410
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

MIGBACK contains information on respondents' migration background for all persons who have ever been a part of a SOEP household (i.e., the population from PPFAD, PPATH or PPATHL). In comparison to GERMBORN, the variable MIGBACK is useful to identify immigrants' descendants by combining information on respondents' country of birth (see GERMBORN) and (grand-)parental information such as their country of birth and their citizenship. Respondents were assigned to the MIGBACK categories based on country of birth (see GERMBORN): Being born in another country than Germany indicates, by definition, a direct migration background (2), while respondents born in Germany may have either no (1) or an indirect (3) migration background. Respondents whose parents had no migration background were assigned the code "(1) no migration background", while respondents whose father or mother had a migration background were assigned the code "(3) indirect migration background".

miginfo - Migback: Quality of information

1	No (grand-)parental information	131197
2	At least 1 (grand-)parental information available	0
-1	No Answer	0
-2	Does not apply	0
-3	Answer improbable	0

-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

MIGINFO indicates the quality of information given in MIGBACK. MIGINFO provides information about the usage of (grand-)parents' migration histories in the SOEP.

germborninfo - Germborn: Quality of information

1	consistent information	93753
2	inconsistent information	1093
3	no answer	36351
-1	No Answer	0
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

GERMBORNINFO indicates the quality of information given in GERMBORN.

corigininfo - Corigin: Quality of information

1	consistent information	7
ı	consistent information	,

-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

IMMIYEARINFO indicates the quality of information given in IMMIYEAR.

locinfo - Loc1989: Source / Quality of information

0	Respondent born after 1989	37133
1	Direct information	81043
2	Indirect information	1372
-1	No Answer	11649
-2	Does not apply	0
-3	Answer improbable	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of Survey program	0

The variable LOCINFO indicates the quality of information given in LOC1989, differentiating between direct and indirect information. LOCINFO provides information about the use of proxy information in the process of generating LOC1989 due to missing values in respondents' and their parents' residence in 1989 in the SOEP. Overall, LOCINFO can take on three different codes: either "(1) direct" or "(2) indirect information" is available on respondents or they were "(0) born after 1989".

4 Weighting

pbleib - Inverse Staying Probability

inverse probability weights

phrf - PRELIMINARY: Weighting factor

standard individual weights. The weighting for the 2023 survey year is based on the previous year's marginal distribution. The updated marginal distributions of the Federal Statistical Office of Germany for 2023 were not yet available to us at the time of the data release. We therefore ask you to apply the weighting for 2023 with caution. The newly drawn sample in 2023 had to be integrated into the weighting with the information on the marginal distributions of the previous year, which can lead to additional inaccuracies.
