**SOEP** Survey Papers  
Series D – Variable Descriptions and Coding

## SOEP-Core v40.1 – HPATHL: Household-Related Meta-Dataset

SOEP Group

Running since 1984, the German Socio-Economic Panel (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)  
Series B – Survey Reports (Methodenberichte)  
Series C – Data Documentation (Datendokumentationen)  
Series D – Variable Descriptions and Coding  
Series E – SOEPmonitors  
Series F – SOEP Newsletters  
Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveyspapers>

	hhrf – Weighting factor . . . . .	7
	hhrf0 – Weighting factor for new samples (wave 1 of new sample) . . . . .	7
	hhrf1 – Weighting factor without new samples (wave 1) . . . . .	7
	hrgroup – Random Groups . . . . .	7
	weighted – Reason the household has no weight . . . . .	8
	complete – Indicator for a household being realized completely, partial, or has missing instruments . . . . .	8

## 1 General Information

The path datasets should be the building block of any analysis. Path Files indicate the total population at the household and individual level (over time) and provide all IDs necessary to access further files at different levels (Krause/Glass/Reher 2019a,b). Path-Files are delivered in three data formats – in long-format [H|P-PATHL] (as the most comprehensive version including weighting variables), in wide-format [H|P-PFAD] (the traditional version), and in a short-version [H|P-PATH] as a reduced population file (indicating the total of population of households and individuals) Household Level [HID|SYEAR] {Navigation File: H-PATH-L (long-format)} Individual Level [PID|SYEAR] {Navigation File: P-PATH-L (long-format)} Household Level [HID] {Population File: H-PATH} Individual Level [PID] {Population File: P-PATH} Household Level [HID (HHNRAKT)] {Path File: HPFAD (wide-format)} Individual Level [PID (PERSNR)] {Path File: PPFAD (wide-format)}. The constituting SOEP population considers three levels – cases, households, and individuals. Due to the SOEP sampling and survey process, these levels follow an implicit hierarchy. All samples refer to primary source households – indicated by the household id at the time when the survey starts – the (fixed) Case ID [CID]. New Households may emerge from these original households during the longitudinal survey process by split-offs of family members – all (current) households are therefore indicated by a (variable) Household ID [HID]. IDs for individuals living in the households are derived from the households, where they were living when they were surveyed for the first time – the (fixed) Personal ID [PID].

## 2 Primary Key, Foreign Keys, and Sample Information

### hid – Current Wave HH Number

The members and configuration of a household with a given ID (HID) can change between years. Depending on the respective research issue it may be necessary to check alterations using PPATHL, where persons are assigned to a household in each year.

### syear – Survey Year

1984	10363
1985	6142
1986	5878
1987	5512
1988	5403

2020	57341
2021	22723
2022	71807
2023	78754

Survey year (Reference Year for survey instruments)

#### **cid** – Original Household Number, Case ID

---

Case Id - Household Source Identifier (fixed). The fixed household source id point to the first SOEP ancestor households to which current households can be traced back to. This variable is relevant for sampling information and calculating the weights.

#### **hsample** – Sample Member

---

1	A 1984 Initial Sample (West)	125039
2	B 1984 Migration (until 1983, West)	32428
3	C 1990 Initial Sample (East)	57151
4	D 1994/5 Migration (1984-1994, West)	10172
5	E 1998 Refreshment	13276

29	M8c IAB-SOEP 2023 Refreshment	16500
30	M9 IAB-BAMF-SOEP 2023 Refugee	33766
-1	No answer	0
-2	Does not apply	0
-3	Implausible value	0

-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	0
-9	Missing due to a terminated interview	0

Unchanging sample membership at first contact with SOEP (at the point of selection of the original household into the sample).

### 3 Survey History

#### hnetto – Aktueller Befragungsstatus

---

1	Successful HH Interview	468837
2	HH In Brutto Only	99275
3	unsuccessful, initial gross sample	225679
-1	No answer	0
-2	Does not apply	0
-3	Implausible value	8
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	0
-9	Missing due to a terminated interview	0

Wave-specific survey status: for HNETTO=1 there is a HH interview in the respective year, i.e. an entry in the file HL. For HNETTO=2 there is only an entry in the file HBRUTTO, but the HH could not be interviewed (the reason for which is given by the variable HERGS in the file HBRUTTO). HNETTO=3 indicates unrealized Households of new samples in HBRUTTO-Files.

#### hiyear – Interviewjahr (InterviewYear)

---

1984	5921
1985	6109
1986	5838
1987	5472
1988	5365
1989	5171
1990	7225
1991	7275
1992	7264
1993	7226
1994	7373
1995	7498

1996	7447
1997	7391
1998	8330
... (12 rows omitted)	160598
2011	19232
2012	19223
2013	20861
2014	19572
2015	19267
2016	21065
2017	22148
2018	24109
2019	24588
2020	23501
2021	14371
2022	23876
2023	1212
-2	200517
<NA>	78754

Interview Year (indicates household interviews realized also outside of standard SYEAR)

## 4 Basic Demographic Information

### sampreg – Aktuelle Stichprobenregion

---

1	West Germany	577921
2	East Germany	142846
-1	No answer	0
-2	Does not apply	73024
-3	Implausible value	8
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	0
-9	Missing due to a terminated interview	0

The variable SAMPREG tells whether a HH was located in West or East Germany in the respective year. This variable approximates also former regional differences within Berlin according to zip-codes.

### hpop – Aktuelle Populationszugehoerigkeit

---

1	Private HH, German HH-Head	454518
2	Private HH, Foreign HH-Head	94148
3	Institutionalized HH, German HH-Head	4134

4	Institutionalized HH, Foreign HH-Head	10024
-1	No answer	0
-2	Does not apply	230975
-3	Implausible value	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	0
-9	Missing due to a terminated interview	0

POP was derived from WUM2 in HBRUTTO as well as PNAT\_V\* and STELL\_V\* (nationality and relationship to head of household in PBRUTTO). Missing values were imputed based on the person's history. Thus, the only admissible missing value is -2, meaning not applicable. This variable is therefore particularly important, as it enters into the determination of cross-sectional weights. The variable corresponds with POP in PPATH/L.

## 5 Weighting

### **hbleib** – Inverse Staying Probability

---

inverse probability weights

### **hhrf** – Weighting factor

---

standard household weight

### **hhrf0** – Weighting factor for new samples (wave 1 of new sample)

---

household weight for first wave of new samples

### **hhrf1** – Weighting factor without new samples (wave 1)

---

household weights without first wave of new samples

### **hrgroup** – Random Groups

---

0	228379
1	70361
2	70182
3	70747
4	68266
5	71005
6	72496
7	71167
8	71196

**weighted** – Reason the household has no weight

---

1	Yes	460737
2	No: HH not completed (syear < 2021)	63056
3	No: HH not completed (syear >= 2021), see variable complete	36081
4	No: Sampled using non-random selection methods	4015
5	No: Weighted from 1995 onwards	93
6	No: Out of sample: below income threshold	436
7	No: Transferred to Innovation Sample	3251
8	No: Not eligible in first wave	339
9	No: Out of sample: households without refugees	8
10	No: Improper interviews	96
-1	No answer	0
-2	Does not apply	225687
-3	Implausible value	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	0
-9	Missing due to a terminated interview	0

Indicator for a household having a weight and if not giving a reason for it

**complete** – Indicator for a household being realized completely, partial, or has missing instruments

---

1	Yes: HH matrix, HH interview, all PE interviews available	24900
2	Yes: HH matrix, HH interview, at least one PE interview missing	27845
3	No: HH matrix, no HH interview, at least one PE interview available	950
4	No: HH matrix, HH interview, no PE interview available	1017
5	No: HH matrix, no HH interview, no PE interview available	2595
6	No: No HH matrix, HH interview, at least one PE interview available	300
7	No: No HH matrix, no HH interview, at least one PE interview available	67
8	No: No HH matrix, HH interview, no PE interview available	16
9	No: No HH matrix, no HH interview, no PE interview available	31296
-1	No answer	0
-2	Does not apply	84298
-3	Implausible value	0
-4	Inadmissible multiple response	0
-5	Not included in this version of the questionnaire	0
-6	Version of questionnaire with modified filtering	0
-7	Only available in less restricted edition	0
-8	Question this year not part of survey	620515
-9	Missing due to a terminated interview	0

Vollständige oder teilweise Realisierung eines Haushaltes und fehlende Instrumente
