SOEP-Core v40.1 – INSTRUMENTATION: Information on the Utilization of Ques- tionnaires

Jana Nebelin and SOEP Group

Running since 1984, the German Socio-Economic Panel (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)
Series B – Survey Reports (Methodenberichte)
Series C – Data Documentation (Datendokumentationen)
Series D – Variable Descriptions and Coding
Series E – SOEPmonitors
Series F – SOEP Newsletters
Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveyspapers>

1 General Information

The dataset instrumentation records at person level which survey instruments are planned and the respective implementation status since 2021.

This is a generated data record in long format. If information about another person is provided in the instrument (e.g. for children's instruments), the number of the third person is also stored in the data record (pid2). This means that each line is uniquely identified by the household, person and instrument ID (hid, pid, instrument and pid2) as well as the year (syear).

The basis for deciding which instruments are to be used is the so-called realized household matrix. If this is not yet available for a household, the information from the deployment sample is used instead.

Missing information (e.g. which person in the household should provide information about a child) is stored in the data record with the code -1. Further information and assistance can be found in the SOEP Companion (Working with SOEP data > Working with information of instruments).
