variable K_INHH indicates the wave-specific household affiliation of a child and can be found as \$PZUG in the file \$PBRUTTO. The values (19) and (39) have been recoded in the file \$KIDLONG, and are now assigned code "-1" (no answer).

k_nrinhh – Serial Number Of Child

k_size – Household Size

Variable K_SIZE is a copy of the variable HHGR from the file HBRUTTO.

k_nrkid – Number Of Children In Household

For each child in KID the variable K_NRKID provides the total number of children up to the age 16 in the current wave's household.

k_phead – Pointer to head of household

Generated as PID of the head of household, i.e. person with STELL = 0 in the file PBRUTTO.

k_pheadp – Pointer To Partner Of Head

PID of the partner of the head of household. K_PHEADP combines information of STELL in the file PBRUTTO with the partner information taken from the variable PARTNR in file PGEN.

k_pmum – Pointer to mother

PID of a child's mother. The procedure for generating the pointers was modified to define the mother-child relationship as a combination of the variables STELL (=relationship to household head) and PARTNR (=person ID number of spouse or partner). The information of PARTNR in file PGEN is only available when an interview took place with the partner. If this data is lacking the combination of relationship to household head of the mother and of the mother's partner is used. Further information on the definition of social/biological mother-child relationships in the SOEP can be found in the BIO documentation for the file \$BIOBIRTH.

k_pmump – Pointer to partner of mother

PID of the partner of the child's mother (cf. PARTNR of the mother in the person-related file PGEN).

8 Variables on costs of institutions, carer, activities etc

In wave BA (2010) a new instrument was introduced within the household questionnaire regarding children up to age 16: How much do the above mentioned school, care and activities cost you? Parents indicate average monthly cost of their children regarding school, care, and (leisure) activities, e.g., early music education, sports, etc.. Since the questions regarding "activities" are surveyed every two years, the costs are also only available every other year. Description of variables KC_AMTP and KC_COST can be found in Section 6: Variables describing carer outside the household. These variables are not available in IS11 and IS12.

k_amtp – Average Costs Per Month

The variable K_AMTP describes the costs of school, care and activities. In wave BA (2010) average monthly costs were surveyed: How much do the above mentioned school, care and activities cost you? Parents indicate average monthly cost of their children regarding school, care, and (leisure) activities, e.g., early music education, sports, etc.. In wave BA this variable was surveyed for the first time. Other than variable KD_AMTP, the variable K_AMTP identifies overall average monthly costs and not just day care fees. This variable is not available for the survey years 2011 and 2012 of SOEP-IS.
